FOLLOWING IN THE FOOTSTEPS OF THE WORLD'S NUMBER 1 PTO AIR COMPRESSOR

THE AIR POWER YOU NEED, WHEN YOU NEED IT

## RELIABLE AIR POWER AT A PRICE THAT FITS YOUR BUDGET

Applied's Varimount 120 follows in the footsteps of the Varimount 350, arguably the world's leading PTO Compressor. It's everything you ever wanted in a PTO Compressor at a price that works for your budget. Over one thousand hours of field testing have proven it tough enough to surpass your expectations in a range of applications, even in the harshest of outdoor environments because you deserve a compressor that can handle anything you throw at it. We have checked and rechecked every element to ensure it lives up to the same attention to detail and exceptional manufacturing standards you've come to associate with the Applied name.

## KEY FEATURES OF THE APPLIED VARIMOUNT 120 PTO AIR COMPRESSOR

### 1 VERSATILITY

As the name suggests, the Varimount 120 can be quickly and easily mounted onto the rear or front linkage of any tractor for maximum flexibility and reliable performance power.

### 2 RELIABILITY

The Applied Pinnacle air end delivers a guaranteed 120 CFM. With just two moving parts – the asymmetrical profile rotors – contact occurs on a lubricated pitch-line, so wear is virtually eliminated. As a result, the compressor doesn't lose capacity or efficiency.

### 3 PRACTICALITY

The Varimount 120 features the innovative Combi-Cooler, effectively an oil cooler and air after cooler in one. The oil cooler fan is designed to the highest specifications and delivers all the cooling power required to keep the oil temperature regulated, ensuring continuous and safe operation. The air after cooler is equipped with an automatic water separator, a critical component that offers numerous advantages for your compressed air system and downstream equipment. This includes significantly reducing moisture levels in the compressed air, effectively preventing issues such as corrosion, contamination, and safeguarding your pipes, tools, and machinery from water-related damage. In the world of powering blasting machines, moisture-free air is an absolute necessity, and the Varimount 120 precisely delivers that.

## KEY FEATURES OF THE APPLIED VARIMOUNT 120 PTO AIR COMPRESSOR

### 4 DURABILITY

Working outdoors in all weathers is no place for electronics. With patented pneumatic controls and an exceptional quality finish, the Varimount 120 is built to endure harsh working conditions and heavy use. The chassis and main compressor components are zinc-primed and powder-coated in the signature Applied Green colour by skilled operators in our world-class on-site powder coating facility ensuring their longevity and durability. You can rely on the Varimount 120 to withstand corrosion and wear while making short work of everyday agricultural, commercial, construction, and industrial tasks, making it the go-to PTO Compressor for budget-conscious customers.

### 5 A COMPACT FOOTPRINT

At only 1199mm x 1090mm with an operating mass of 670 kgs, you can access the air power you need without being burdened by unnecessary extra weight.

### 6 HASSLE-FREE MAINTENANCE

An intelligent design layout ensures all maintenance parts are accessible via an easy-to-open hinged cover while the availability of self-service kits means minimum downtime for you.

### 7 VALUE FOR MONEY

Precision engineered to maximise performance and make the portable air power you need more attainable and affordable. We offer a range of colour options for the main exterior frame of your Varimount 120. Choose the colour to match your tractor just the way you want it.

## DESIGNED BY APPLIED. INSPIRED BY YOU.

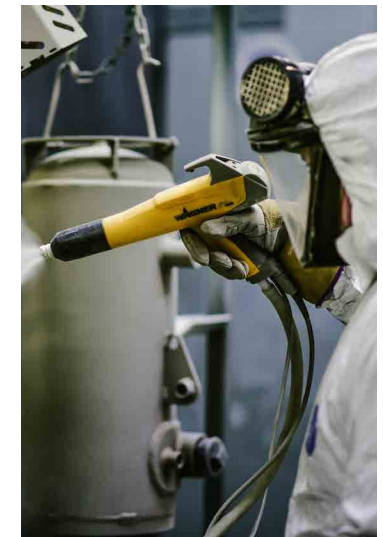

At Applied, when you ask, we listen. It's what makes us a trusted manufacturer of blasting machines and PTO driven air compressors to our many customers worldwide. You asked for an equally versatile but lightweight version of the Applied Varimount 350 that can run off smaller model tractors. And we wasted no time putting our expert mechanical and product design engineers to work engineering an equally robust, but compact PTO compressor that delivers on performance and meets the power demands of everyday agricultural, commercial, construction, and industrial tasks. Like the Varimount 350, the Varimount 120 can be mounted on the front or rear of your tractor, helping to ease your workload while eliminating the challenges and potential hazards of towing a standard mobile compressor.

### MADE IN IRELAND

From our beginnings in a modest workshop, to Applied's state-of-the-art production facility in Birr, Co. Offaly, we've spent 13 years designing and manufacturing superior quality blasting machines and PTO driven air compressors. Each product is made with the same dedication to excellence that's been our trademark since the beginning. Our best-in-class Varimount 120 comes with a promise of safety, durability, and value for money, plus the technical support of our expert Applied Service Team.

### ENVIRONMENTAL SAVINGS

Unlike other mobile compressors with mounted diesel engines, the Varimount 120 shares your tractor's engine. This two-for-one design means your diesel emissions are automatically halved. That's better for you and better for the environment.

## A MULTI-PURPOSE PTO COMPRESSOR BUILT TO DELIVER THE AIR POWER YOU NEED, WHEN YOU NEED IT.

The latest addition to Applied's PTO compressor family builds on the same features and functions that have made the Varimount 350 the benchmark in PTO compressors. With a guaranteed output of 120 CFM, the Varimount 120 is ideally suited for a range of light agricultural, commercial, construction, and industrial applications. Whether you're cleaning out the lines of a small umbilical slurry system, jetting cable into a pre-installed duct, or attaching it to one of our blasting machines, the Varimount 120 delivers the air power you need, when you need it.

- 1** A powerful & effective partner in the cleaning of agricultural machinery.
- 2** Attach the Varimount 120 to a blasting machine and you've got a multi-purpose blaster fit to tackle everyday blasting tasks.
- 3** Its compact size and manoeuvrability makes the Varimount 120 ideal for construction work, especially in tight spaces and without adding unnecessary extra weight.
- 4** The go-to solution for jetting cable into a pipe or pre-installed duct.

THE AIR POWER YOU NEED, WHEN YOU NEED IT

## WITH YOU ALL THE WAY.

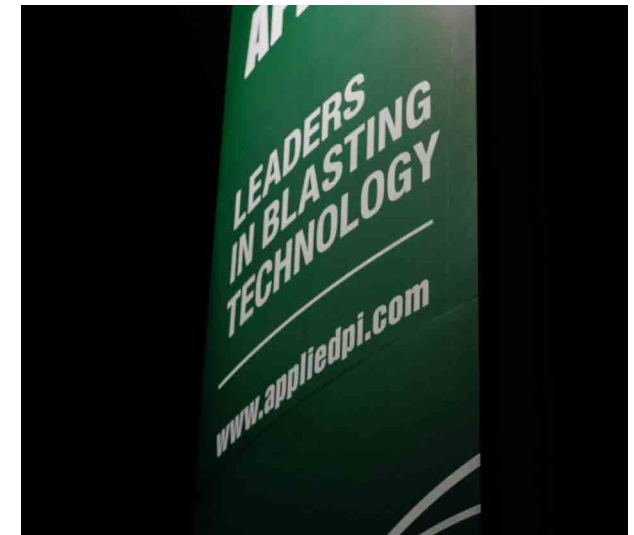

From superior quality, CE approved portable blasting machines and blasting cabinets to the Varimount 120, the Applied name comes with a promise of safety, durability, and unbeatable value for money. Purchase the Varimount 120 and enjoy the confidence that comes with a premium product from a market-leader in the field, backed by access to our expertise and technical support whenever you need it.

### BACK-UP SERVICE & SPARE PARTS

Our Support Service Team is on hand to provide any assistance you need after purchasing your machine. We also offer a range of Applied service kits for different hour-usage levels; 500hr, 1000hr, etc., including all the filters, seals, oils, and other parts you may need to service your equipment. And you can count on us to get them to you as quickly as possible on receiving your order.

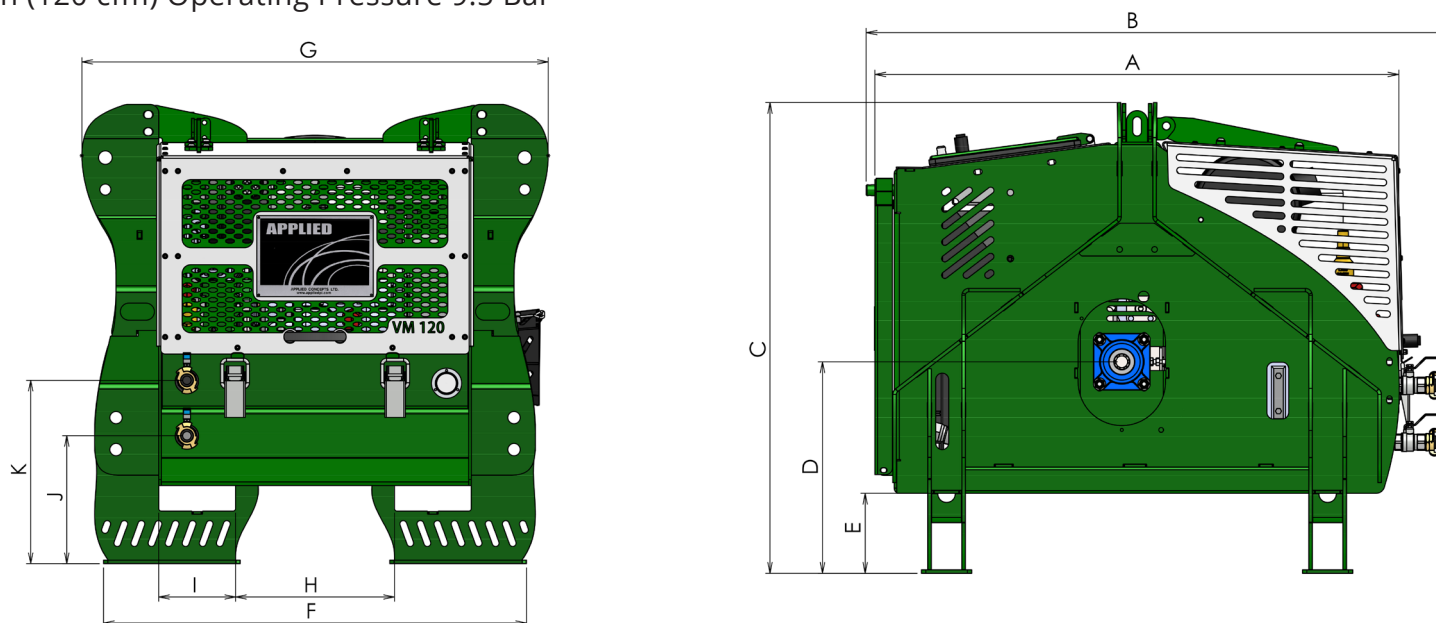

### WARRANTY & EASE OF PURCHASE

We make it easy for you to buy from us with our clear and simple purchasing system. And as an owner-vested manufacturing company, we have the flexibility to adapt to your order needs and streamline the journey from factory-floor to delivery, no matter where you are located. Plus, all Applied products come standard with a two-year warranty for your peace of mind.
